anthony stratton, "Bruce Yates (BYates@globalp.com)", "phil segaloff", "Ron Kenny(RKenny@Globalp.com)", Steve Piper, Tom Olivier, William Osbahr

Tom,

I am writing to approve the pretest protocol submitted electronically by Anthony Stratton on May 16, 2012 with the condition that air sparging be conducted during the test period. Steve Piper indicated in an email on June 19, 2012 that air sparging would be included in the test program because Global would conduct air sparging during the receipt of asphalt and #6 oil. As described, this would be an acceptable approach to including air sparging in the test program.

Please keep us informed of the delivery schedule as you learn more information.
